一、 Physicochemical

GB NO.		C A S :	
Chinese name	暖贴		
English name	warm pad		
Main ingredients	Non-woven(cotton 50%, 50%pulp) powder Activated Carbon10%,Iron20%, salt 5%, 水 water 30%. Vermiculite 35%)		
Melting Point	4200℃		
Density	The relative density 1.8~2.1		
Vapor pressure	Negative		

solubility			
Stability	Good		
Appearance and Characters	White nonwoven(containing balack powder),odorless		
Danger mark	No		
Uses	Warm and Fomentation Therapy		

2.Impact to Environment:

一、 Hazard to Health

Ways to invasion: If touches eyes accidently , wash them immidiatly.
.If swallows accidently , mouthwash and visit doctor.

Hazard to Health:

Please avoid uses of being on one part of body, if their is any discomfort, take it off immidiatly, beware cryogenic burns.

.Kid s, diabetics, pregnant,disabilities,people with sensitive skin should use cautiously.

二、 Toxicological Information and Environmental behavior

1.danger character: no

3. Emergency Monitoring Methods

4.Monitoring Methods in Lab

5.Environment standard no

Protection methods: Wear gloves and uniforms while operating. Take shower everyday

First aid:

三、.If touches eyes accidently , wash them immidiatly.If swallows accidently , mouthwash and visit doctor.

四、 As regular garbage,no extra treatments

五、.Danger to transportation: no as regular cargo.
